| **Date:** | 16 October 2026 |

# Dashboard overview

This page shows the Nykaa Sales Dashboard built for this practical. It has five filter cards, five KPI cards and six charts. Choosing any filter updates every KPI and chart together, so one view can be used to study any category, city, channel, customer type or quarter.

## How to read the dashboard

Filter cards. Category, City, Channel, Customer type and Quarter let the viewer narrow the data. For example, selecting Skincare and Mumbai shows only Skincare orders placed in Mumbai.

KPI cards. Total revenue, orders, units sold, average order value and average discount give the headline numbers at a glance.

Monthly revenue (line chart). Shows how sales move month by month, so festive peaks and the February dip are easy to spot.

Sales by channel (doughnut). Compares the app, website, retail stores and marketplaces. The app is the largest channel.

Revenue by category (bar). Ranks the six product categories. Skincare and Makeup lead.

Top 8 brands (bar). Shows which brands earn the most revenue, led by Plum and Minimalist.

Revenue by city (column). Compares eight cities. Mumbai, Delhi and Bengaluru are the top three.

Payment mode (doughnut). Shows how customers pay. UPI is the most used mode, and cash on delivery is still close to one fifth.

The dashboard was designed as a web page. The same layout can be rebuilt in Power BI using slicers for the filters, card visuals for the KPIs and the matching chart visuals, with the dataset loaded as a table.

# Nykaa Sales Analysis Report

Period: October 2025 to September 2026. Source: the sample dataset behind the Nykaa Sales Dashboard (1,500 orders). The data was generated for demonstration, so the numbers show how the analysis works and are not Nykaa's actual results.

## 1. Executive summary

The 1,500 orders produced about ₹22.89 lakh in revenue from 2,466 units, with an average order value (AOV) of ₹1,526 and an average discount of 17.3%. Skincare and Makeup together bring in more than half of all revenue. The app is the strongest channel, a few metro cities account for most sales, and returning customers drive nearly two thirds of revenue.

- Skincare (29.6%) and Makeup (26.1%) are the two core categories.
- The app alone delivers 48.8% of revenue.
- Mumbai, Delhi and Bengaluru together contribute 55.4% of revenue.
- Returning customers generate 63.5% of revenue.
- Discounts of 30% and above lift unit volume very little but pull down revenue per order.

## 2. Headline numbers

| Metric | Value |
|---|---|
| Total revenue | ₹22.89 lakh |
| Orders | 1,500 |
| Units sold | 2,466 |
| Average order value | ₹1,526 |
| Average discount | 17.3% |

## 3. Sales trend over time

Monthly revenue ranged from about ₹1.51 lakh in February to ₹2.49 lakh in September.

- Peak months: September (₹2.49 lakh), June (₹2.28 lakh) and November (₹2.12 lakh).
- Weakest months: February (₹1.51 lakh), October (₹1.67 lakh) and August (₹1.69 lakh).
- By quarter, April to June was strongest (₹6.06 lakh), then July to September (₹5.99 lakh). January to March was weakest (₹5.01 lakh).

November and December show the festive and gifting lift, and June and September show strong mid-year sale activity. February is the clear dip, so it is the best month for a targeted campaign.

## 4. Category performance

| Category | Revenue | Share | Avg order value |
|---|---|---|---|
| Skincare | ₹6.78 lakh | 29.6% | ₹1,691 |
| Makeup | ₹5.96 lakh | 26.1% | ₹1,454 |
| Fragrance | ₹3.97 lakh | 17.3% | ₹2,661 |
| Hair Care | ₹3.23 lakh | 14.1% | ₹1,237 |

| | | | |
|---|---|---|---|
| Bath & Body | ₹1.56 lakh | 6.8% | ₹957 |
| Men's Grooming | ₹1.39 lakh | 6.1% | ₹1,195 |

Fragrance has few orders (149) but by far the highest AOV, so it punches above its weight. Bath & Body has the lowest AOV and is the natural candidate for bundles and add-on offers.

## 5. Brand performance

- Plum: ₹1.86 lakh (8.1%)
- Minimalist: ₹1.55 lakh
- Nykaa Cosmetics: ₹1.41 lakh
- The Derma Co: ₹1.32 lakh
- Maybelline: ₹1.30 lakh

Skincare-focused brands lead the list, matching the category ranking. Nykaa's own label ranks third, which shows the strength of the in-house brand.

## 6. Geography

| City | Revenue | Share |
|---|---|---|
| Mumbai | ₹4.83 lakh | 21.1% |
| Delhi | ₹4.16 lakh | 18.2% |
| Bengaluru | ₹3.69 lakh | 16.1% |
| Hyderabad | ₹2.79 lakh | 12.2% |
| Kolkata | ₹2.18 lakh | 9.5% |
| Pune | ₹2.08 lakh | 9.1% |
| Jaipur | ₹1.68 lakh | 7.3% |
| Lucknow | ₹1.47 lakh | 6.4% |

The three largest metros account for 55.4% of revenue. Smaller cities such as Jaipur and Lucknow are the main room for growth through localised offers and faster delivery.

## 7. Channels and payments

Channels. The app generates 48.8% of revenue, the website 22.8%, retail stores 18.5% and marketplaces 9.8%. App experience, notifications and loyalty features deserve the most investment.

Payments. UPI leads with 37.9%, then credit cards (23.4%), cash on delivery (18.7%), debit cards (13.0%) and wallets (7.0%). Cash on delivery is close to one fifth of revenue and usually carries higher return and logistics costs, so moving these customers to prepaid options would improve margins.

## 8. Customers

Returning customers placed 950 orders (63.3%) and generated ₹14.54 lakh (63.5% of revenue). New customers placed 550 orders and generated ₹8.34 lakh. AOV is almost the same for both (₹1,531 returning, ₹1,517 new), so the revenue gap comes from how many people return, not from how much they spend. Retention is the biggest lever.

## 9. Discount analysis

| Discount | Orders | Revenue | Revenue per order |
|---|---|---|---|
| 0% | 128 | ₹2.22 lakh | ₹1,734 |
| 10% | 331 | ₹5.43 lakh | ₹1,641 |
| 15% | 334 | ₹5.23 lakh | ₹1,567 |
| 20% | 328 | ₹4.80 lakh | ₹1,464 |
| 25% | 186 | ₹2.92 lakh | ₹1,571 |
| 30% | 134 | ₹1.72 lakh | ₹1,284 |
| 40% | 59 | ₹0.56 lakh | ₹941 |

Most orders sit between 10% and 20%. Orders at 30% and 40% make up 12.9% of orders but only 9.9% of revenue, and units per order do not rise much with deeper discounts. Moderate discounts of 10% to 20% give the best balance of volume and value.

## 10. Recommendations

1. Protect the core. Keep Skincare and Makeup well stocked and feature Minimalist, Plum and Nykaa Cosmetics in promotions.
2. Grow Fragrance. Its AOV is the highest, so gift sets and festive bundles can lift revenue.
3. Invest in the app. Use notifications, loyalty points and personalised offers to keep returning customers coming back.
4. Fill the February dip. Plan a campaign such as a Valentine's or self-care sale.
5. Reach smaller cities. Test local offers and delivery promises in Jaipur, Lucknow and Pune.
6. Limit deep discounts. Hold 30% and 40% offers for clearance.
7. Shift cash on delivery to prepaid. Offer small prepaid rewards to cut logistics cost and returns.

## 11. Method and limits

All figures come from a sample dataset of 1,500 orders generated for this dashboard. Percentages are shares of total revenue unless stated otherwise. Because the data is synthetic, re-run these findings on your real dataset before any business decision.
